In this delightful and illuminating look into a crucial but little-known "hinge" of history, Thomas Cahill takes us to the "island of saints and scholars," the Ireland of St. Patrick and the Book of Kells. Here, far from the barbarian despoliation of the continent, monks and scribes laboriously, lovingly, even playfully preserved the West's written treasury. When stability returned in Europe, these Irish scholars were instrumental in spreading learning, becoming not only the conservators of civilization, but also the shapers of the medieval mind, putting their unique stamp on Western culture.

HOW THE IRISH SAVED CIVILIZATION: THE UNTOLD STORY OF IRELAND'S HEROIC ROLE FROM THE FALL OF ROME TO THE RISE OF MEDIEVAL EUROPE (THE HINGE PDF

The perfect St. Patrick's Day gift, and a book in the best tradition of popular history -- the untold story of Ireland's role in maintaining Western culture while the Dark Ages settled on Europe.

Every year millions of Americans celebrate St. Patrick's Day, but they may not be aware of how great an influence St. Patrick was on the subsequent history of civilization. Not only did he bring Christianity to Ireland, he instilled a sense of literacy and learning that would create the conditions that allowed Ireland to become "the isle of saints and scholars" -- and thus preserve Western culture while Europe was being overrun by barbarians.

In this entertaining and compelling narrative, Thomas Cahill tells the story of how Europe evolved from the classical age of Rome to the medieval era. Without Ireland, the transition could not have taken place. Not only did Irish monks and scribes maintain the very record of Western civilization -- copying manuscripts of Greek and Latin writers, both pagan and Christian, while libraries and learning on the continent were forever lost -- they brought their uniquely Irish world-view to the task.

As Cahill delightfully illustrates, so much of the liveliness we associate with medieval culture has its roots in Ireland. When the seeds of culture were replanted on the European continent, it was from Ireland that they were germinated.

In the tradition of Barbara Tuchman's *A Distant Mirror*, *How The Irish Saved Civilization* reconstructs an era that few know about but which is central to understanding our past and our cultural heritage. But it conveys its knowledge with a winking wit that aptly captures the sensibility of the unsung Irish who relaunched civilization.

Thomas Cahill's history of Ireland during the middle ages is so well and cleverly written that you will never know you are reading nonfiction. The theme running through is as engrossing as "Vikings" on the History Channel. It is grounded in solid facts, many of which are not well known, making it a fascinating read. The author is a scholar, whose prose is not only lyrical and learned, but paints word pictures of western civilization after the fall of the Roman Empire. You will have a whole new regard for the contributions of the "Emerald Isle."

Thomas Cahill deserves more respect and recognition. In addition to his ability to write engagingly and clearly, his views on Western Civilization's key turning points are, in my view, spot-on. Reading all of this series is like getting a Masters in Liberal Arts (without having to read everything from Homer through Dante).

Astounding insight into a lesser known portion of ancient history

By Aardvark

This book takes a few hundred pages to really delve into the unsung heroes of modern civilizations: The Irish. Cahill aptly presents the good, bad, and ugly for how the Irish influence arose out of the waning Roman borders, how it preserved the realm of Christianity and culture in the far reaches of the known world amid the growing barbarian hordes, and how it less than nobly exited historical significance in the more modern era.

Quick read, thorough read, and captivates the reader using both facts and memorable characters of the era to show that, yes, the Irish really *did* save civilization.
