P-61 BLACK WIDOW IN ACTION BY DAVID DOYLE PDF

Designed by Jack Northrop and Vladimir Pavlecka in response to a secret Army Air Corps request, the Northrop P-61, dubbed the Black Widow, became America's first purpose-built night fighter, and the largest and most heavily-armed operational fighter flown by the United States during World War II. Despite being the size of a medium bomber, the unique control surfaces of the P-61 made it surprisingly agile, and among its many successes was the downing of the final enemy aircraft of the war. This book tells the complete story of the Black Widow from the experimental XP-61 on through the final production variant, the F-15A photo-recon model. Illustrated throughout with 164 black and white and 30 vintage color photographs, four color profiles, and a dozen detailed line drawings.

Excellent acquisition

By Peter D. Shirk

Excellent book with new material, photos, and info. So many books are just a re-hash of prior material it is good to see an author expand on what has been done before. This is a worthwhile addition to my library.

Typical "In-Action Publication

By Dummy

To adequately either model or study the P-61, you need at least four books. This is one of them. It is well researched and presented just like all of the other "In-action" publications. I recommend it.
